The key event of the exhibition business programme, the **19th conference 'Efficient heating, ventilation, air-conditioning and heating supply'** organised by PRIMEXPO jointly with NP ABOK, will be held on 21 April, 2016. Participants of the conference will learn about effective engineering equipment and the experience in its application in domestic and industrial facilities. Also on this day, **master-class 'Systems of antismoke ventilation'** will be held. At the master-class the HVAC industry specialists will get information about new fire safety requirements that affect space-planning and constructive solutions for buildings and underground constructions.
